

Workshop on Android Application Development for Student of Department of CSE, AUST

Department of Computer Science and Engineering (CSE), AUST has organized a workshop on Android Application Development for the students on March 05, 2019 at CSE department. This workshop is powered by BDApps, a software venture of the second large mobile operator in Bangladesh, Robi Axiata Ltd. Professor Dr. Kazi A. Kalpoma, head of the CSE department has always inspired the student to perform and participate different workshop and seminar as co-curricular activities with regular academic schedules. Prof. Dr. Kalpoma has expressed and guided the seminar workshop committee to make some event with different companies to give the students a flavor of current industrial works.

In this process the seminar and workshop committee of CSE department organize this event with BDApps. Students from the deferent semesters took part in the program. Robi BDApps trainers gave a very fruitful session to the students on interacting with telecommunication API. Moreover they shared some software tools and online links about how to connect the android application for broadcast public messaging service with the telecommunication channel. They also presented a module of establishing secure mobile financial transaction API. The workshop successfully ended at 6:00 PM.
